

Winter Term 2025 / 2026

BioCenter Seminar Series

Date	Speaker Title	Institute – Work Group	12:00 noon Fridays - Lecture hall
10.10.25	Laura Sammarco Identification of Cargos in L-type lectins	<i>Pathophysiology - Farhan</i>	M.01.490
24.10.25	Martina Mari How SZT2 Loss Rewires Cellular Metabolism	<i>Cell Biology - Huber</i>	M01.470 / M01.490
07.11.25	Natascha Kleiter Loss of NR2F6 protects from <i>Salmonella Typhimurium</i> Infection	<i>Cell Genetics - Kleiter</i>	M.01.490
14.11.25	Sarah Spöck TET Enzymes Guard B Cell Identity and Protect against Malignant Reprogramming	<i>Developmental Immunology - Labi</i>	M.01.490
28.11.25	Mariana Araujo BORC Assemblies Integrate BLOC-1 Subunits to Diversify Endosomal Trafficking Functions	<i>Cell Biology - Araujo</i>	M01.470
12.12.25	Ana Garcia Saez A Membrane Perspective of Cell Death	<i>University of Cologne, Germany - Villunger</i>	M01.470 / M01.490
16.01.26	Ilaria Dorigatti Dissecting the Role of Plasmalogens in Ether Lipid-associated Pathologies	<i>Molecular Biochemistry - Watschinger</i>	M01.470 / M01.490
23.01.26	Lukas Birštonas RttA - a Novel Regulator of Sterol Homeostasis and Azole Resistance in <i>Aspergillus fumigatus</i>	<i>Molecular Biology - Gsaller</i>	M01.470 / M01.490
30.01.26	Astha Purwar ESCRTs at stressed Plasma Membrane	<i>Molecular Biochemistry - Teis</i>	M01.470 / M01.490
