

CCB Lecture Series 2025/26

13.10.2025	Binks Wattenberg, Virginia Commonwealth School of Medicine, USA Title: <i>The Control of Sphingolipid Biosynthesis: Biochemical Mechanisms and Biological Consequences</i> Host: Oliver Schmidt & David Teis
10.11.2025	Luca Fava, CIBIO - Department of Cellular, Computational and Integrative Biology, Trento, IT Title: <i>From Centrosomes to RNA editing</i> Host: Andreas Villunger
01.12.2025	Ann Ehrenhofer-Murray, Humboldt Universität Berlin. Title: <i>Queuosine, pseudouridine and beyond: Detection of tRNA modifications by direct RNA sequencing</i> Host: Alexandra Lusser
19.01.2025	Alwin Köhler, MFPL, Vienna Title: <i>Life at the Edge – Tardigrade Extremotolerance</i> Host: David Teis
09.02.2026	Utz Fischer, Universität Würzburg Titel: <i>Making mRNA in the wrong compartment: how poxviruses express their genes in the host cytoplasm</i> Host: Andreas Mayer
16.02.2026	Guillaume van Niel, Nantes - Angers Cancer and Immunology Research Center, France Title: <i>Fundamental lessons and therapeutic opportunities from live imaging of extracellular vesicles</i> Host: Francesco Baschieri
16.03.2026	Jonathon Nixon-Abel, Cambridge Institute for Medical Research (CIMR), University of Cambridge, UK Title: <i>Understanding Organelle Contact Sites in Neuronal Health and Disease</i> Host: Hesso Farhan
20.04.2026	Jan Lammerding, Cornell University, USA Title: <i>Squish and Squeeze – Nuclear Mechanobiology in Physiology and Disease</i> Host: Hesso Farhan
18.05.2026	Matthias Peter, ETH Zürich, Switzerland Title: <i>Cellular dormancy: keep or degrade?</i> Host: Ludger Hengst
15.06.2026	Matthew Blango, Leibniz Institute for Natural Product Research and Infection Biology-Hans Knöll Institute, Germany Title: <i>Exploring human fungal pathogens through the lens of RNA biology</i> Host: Fabio Gsaller

All guests are welcome

Seminars will be held at 5:00 PM in the CCB Seminar Room M 01.470

Hubertus Haas Hesso Farhan Katrin Watschinger
