

CCB Lecture Series 2025/26

- 13.10.2025 Binks Wattenberg, Virginia Commonwealth School of Medicine, USA
Title: **The Control of Spingolipid Biosynthesis: Biochemical Mechanisms and Biological Consequences**
Host: Oliver Schmidt & David Teis
- 10.11.2025 Luca Fava, CIBIO - Department of Cellular, Computational and Integrative Biology, Trento, IT
Title: **From Centrosomes to RNA editing**
Host: Andreas Villunger
- 01.12.2025 Ann Ehrenhofer-Murray, Humboldt Universität Berlin.
Title: **Queuosine, pseudouridine and beyond: Detection of tRNA modifications by direct RNA sequencing**
Host: Alexandra Lusser
- 19.01.2026 Alwin Köhler, MFPL, Vienna
Title: **Life at the Edge – Tardigrade Extremotolerance**
Host: David Teis
- 09.02.2026 Utz Fischer, Universität Würzburg
Title: **Making mRNA in the wrong compartment: how poxviruses express their genes in the host cytoplasm**
Host: Andreas Mayer
- 16.03.2026 Jonathon Nixon-Abel, Cambridge Institute for Medical Research (CIMR), University of Cambridge, UK
Title: **Understanding Organelle Contact Sites in Neuronal Health and Disease**
Host: Hesso Farhan
- 18.05.2026 Matthias Peter, ETH Zürich, Switzerland
Title: **Cellular dormancy: keep or degrade?**
Host: Ludger Hengst
- 15.06.2026 Matthew Blango, Leibniz Institute for Natural Product Research and Infection Biology-Hans Knöll Institute, Germany
Title: **Exploring human fungal pathogens through the lens of RNA biology**
Host: Fabio Gsaller
- 29.06.2026 Jan Lammerding, Cornell University, USA
Title: **Squish and Squeeze – Nuclear Mechanobiology in Physiology and Disease**
Host: Hesso Farhan

All guests are welcome

Seminars will be held at 5:00 PM in the CCB Seminar Room M 01.470

Hubertus Haas Hesso Farhan Katrin Watschinger
