SEMINAR SERIES

WINTER SEMESTER 2026/27

FRIDAYS / 12.00 PM / CCB INNRAIN 80

16
OCT

Generative pre-training on medical event streams in intensive care

Patrick Rockenschaub

EPICenter | Group: Rockenschaub | Room M01.470 / M01.490

06
NOV

Updates from the facilities

Martin Offterdinger & Sebastian Peer

Biooptics & Flow Facilities | Room M01.470 / M01.490

13
NOV

Relevance of normal adjacent tissue to clinical outcome in early-stage NSCLC

Mieke Nicolai

Internal Medicine | Group: Sopper | Room M01.490

20
NOV

An RNA processing interface at nuclear speckles is mediated by TFIIS

Geno Villafano

RNA Biology and Genomics | Group: Mayer | Room M01.470 / M01.490

27
NOV

Axonal regeneration: Nogo is a no-go no longer

Walter Unterberger

Systems Neuroscience | Group: Schweigreiter | Room M01.470

11
DEC

The PIDDosome-p53 axis dictates cell fate after cell-cell fusion

Paul Petermann

Developmental Immunology | Group: Villunger | Room M01.470

15
JAN

The tissue is the issue - from morphology to omics in tissue based research

Steffen Ormanns

General Pathology | Group: Ormanns | Room M01.470 / M01.490

22
JAN

How cells survive quiescence by controlling nutrient acquisition

Nikolas Marchet

Molecular Biochemistry | Group: Teis | Room M01.470 / M01.490

29
JAN

From death to danger: how mitochondria spark inflammation

Marlene Lochner

Developmental Immunology | Group: Riley | Room M01.470 / M01.490
