

CCB Lecture Series 2026/27

12 OCTOBER 2026
Sascha Martens - Max Perutz Labs, Vienna
Mechanisms of Selective Autophagy
Host: David Teis

19 OCTOBER 2026
Alexander Stark - Research Institute of Molecular Pathology, Vienna
Decoding transcriptional regulation
Host: Andreas Mayer

16 NOVEMBER 2026
Christian Mayer - Max Planck Institute for Biological Intelligence, DE
Epigenetic Control of Forebrain Inhibitory Neuron Development and Its Disruption in Psychiatric Disorders
Host: Sabine Liebscher

07 DECEMBER 2026
Stephanie Ellis – Max Perutz Labs, Vienna
Understanding mosaic tissue dynamics through cell competition
Host: Joel Riley

18 JANUARY 2027
Bethan Psaila - Oxford, UK
Megakaryocytes, whole genome doubling and p53 stealth… from riches to rags of DNA
Host: Valentina Sladky

15 MARCH 2027
Monica Bettencourt-Dias - CRG Barcelona, ESP
The Centrosome-Cilium Complex Across Development, Evolution and Disease
Host: Andreas Villunger

12 APRIL 2027
Erdinc Sezgin - Karolinska Institute, Stockholm, SE
Physical properties of cells as indicator of cellular fitness
Hosts: Michael Ebner & Katrin Watschinger

10 MAY 2027
Guillaume van Niel - CRCI²NA – Nantes–Angers Cancer and Immunology Research Center, FR
Fundamental role of CD63 and its harnessing in the study of extracellular vesicles
Host: Francesco Baschieri

14 JUNE 2027
Jean-Yves Roignant - University of Lausanne, CH
Deciphering the tRNA epitranscriptome: How alterations in tRNA modifying enzymes drive diseases
Host: Alexandra Lusser

All guests are welcome
Seminars held at 5:00 PM, Room M 01.490
CCB, Innrain 80, Innsbruck
Hesso Farhan & Alexandra Lusser
